

**Automatic Cake Cutting Machine - Slice Round Cakes - Cheersonic**

**UFM6000**

**Automatic Cake Cutting Machine**

This automatic cake cutting machine will portion a variety of frozen or chilled round products such as cheesecakes, layer cakes, pies, frozen pizzas, and more. User-friendly operation requires little skill to produce portions in consistent sizes at high production speeds, so no matter who is operating the machine the results will always be the same. Divider Inserts are deposited between each wedge in one smooth operation while cutting the slices, giving the finished cake a professional look. This model works well for bakeries producing from 100-150 frozen products per hour.
