

Food Cutting - Ultrasonic Food Cutting Equipment

Advanced Ultrasonic Systems for Food Cutting Applications

CHEERSONIC offers a complete line of specialized equipment and components for ultrasonic food cutting equipment. Compared to conventional cutters, ultrasonic food cutters are more sanitary, with less down time, better cost-effectiveness and increased consistency at the cutting surface where the blades stay sharp longer.

Cutting tools are manufactured in-house by a precision wire EDM process that reduces stress for longer life. CHEERSONIC provides full customization of OEM components, kits and knife horns. Typical applications include cheese cutting; cake and dessert product cutting; confectionary product cutting; meat cutting; sandwich and wrap cutting.

Ultrasonic Food Cutting Equipment Features:

Stackable, ultrasonic power supplies and panel mount generator kits for NEMA enclosure, integration and sequencing

Rigid mount ultrasonic boosters for improved stack stability

Wash-down duty, air cooled converters (stainless steel body also available)

Food industry approved titanium blade, slitting and knife horns

FEA analyzed horn designs for long life and amplitude accuracy
