

Ultrasonic Slicing Industrial Food Slicer Machines

CHEERSONIC provides efficient, innovative and cost effective solutions for your food processing needs. We provide British engineered solutions to the food industry in partnership with the very best component manufacturers across Europe.

Using Ultrasonic Slicing and Robotic technology we specialize in food processing with proven expertise in the cheese, bakery and paté industry. We know that reliability and performance of your equipment is a vital consideration to your business. We strive for joint success. From the outset, your enquiry is dealt with promptly and professionally. Each application is given focused attention and our response is clear and considered to ensure that our resource and your time are used most effectively. Through direct consultation you will be offered the most appropriate solution to ensure that you maintain a competitive advantage, ultrasonic slicing reduces costs, increases yield, increases productivity and most importantly, increase profit, as does installing robotics and automation.

Our excellent service continues after your equipment is installed. We offer a total support package for your engineering department, with competent and experienced team members available to offer technical assistance, training and competitively priced spare parts. From Ultrasonic Slicing to Data Capture, Automation & Robotics, let CHEERSONIC look after your process.
