

### **Automatic Ultrasonic Cake Cutter - Robotic Ultrasonic Cake Cutting**

#### **Automatic Ultrasonic Cake Cutter**

This automatic ultrasonic cake cutter with robotic technology is designed for continuous supply of products in conveyor belts or containers. It is ideal for sticky, fragile, and difficult to cut products. Ultrasonic cutting machine can cut round, square, rectangular or triangular. This device combines ultrasonic cutting systems, servo drive conveyors, six-axis control systems, safety protection systems, and cleaning units for easy cleaning and hygiene. Upstream by adding an automatic loading system, downstream use of export conveyors or packaging machines, and then to achieve automation.
