

Ultrasonic cutting - all kinds of food

CHEERSONIC offers high quality ultrasonic food processing and cutting equipment, including generators, converters, cutting blades and so on. Over the years CHEERSONIC offers ultrasonic food cutting technology to ensure that the food industry produces the best precision and consistency of the food industry. This video shows CHEERSONIC ultrasonic food cutting technology and highlights the advantages of food processing.

Throughout the process, food manufacturers are not hard to find that ultrasonic cutting has consistent quality, hygienic cutting results, and significantly reduces scrap rates. It can also reduce the downtime cleaning time, a substantial increase in cutting speed.
