

Ultrasonic Guillotine Cutting - Ultrasonic Cutting For Food Production

Our customer's company is engaged in food production.

At my customer on manufacture there was a problem with a guillotine cutting of a zephyr mass.

UFM8000 Ultrasonic cutting is suitable for this procedure

The width of the tape along which the product will move 1000mm, the speed of the product will be regulated from 1m / min to 2m / min, the product is cut to 60mm.

The width of the tape is 1000mm, on this tape there are 22 rows of the product.

The final cut of the product, the size of one product is 60x30x20mm

If you want this equipment, we will give your suggestions.
